# Simon Lazarev

## web developer

Hello, my name is Simon Lazarev. I was born in Karelia. I lived without parents when I was very young and grew up in a foster family. I was educated in the fields of fine arts, information technology, and theology.

My hobbies are playing the guitar, painting, reading poetry, and writing. I wrote a book called "**The Queen of the Seven Mountains**" and I hope to continue writing. I am married without children, but I would like to have children in the future.

My English level is **intermediate**.

Owner of the **like-list** project.

## Get to know me

github  / linkedin  / behance  / hackerrank 

# Education

2010 — 2015

**Saint-Petersburg State University of Culture and Arts**

IT manager

2003 — 2007

**Petrozavodsk Pedagogical College**

Teacher Fine Arts and Drawing

# Experience

09.2023 — till now

## SELF-EMPLOYMENT

### Senior Software Engineer / Outsourcing

work for a company [goldcenter.am](https://goldcenter.am)

improvement of the existing functionality of the site on vue, nuxt and react

development of new application functionality

consultations on optimization issues

### CTO / [like-list.com](https://like-list.com)

development of the concept, design, prototype, frontend and backend of the project

actively developing a personal account and a page for sharing

used MongoDB, fastify.js/nest, docker

solving issues on the next stage concerning advertising monetization and audience recruitment

looking for partners with startup management experience and understanding of the target audience

vue 2/3   nuxt 2/3   react   hetzner   nest   fastify   mongo   typescript   prisma  
docker   redis

05.2022 — 09.2023

### Senior Software Engineer / [TCO team](#)

Exhibited hands-on programming expertise encompassing Vue 2/3, jq, dojo, electron, CSS, native JavaScript (ES5), TypeScript, and Vagrant.

Provided adept technical support, leveraging a profound understanding of intricate technologies to troubleshoot issues and facilitate novel projects.

Championed and fostered a culture of respectful and transparent communication during interactions.

Collaborated closely with development teams to rectify issues and execute test scenarios.

Engaged collaboratively with fellow engineers to assess and enhance software and hardware interfaces.

Teamed up harmoniously with software development and testing colleagues to architect and create robust solutions that met client criteria for functionality, scalability, and performance.

Evaluated project specifications and devised technological solutions that either met or surpassed performance expectations.

Played an active role in the architecture, design, and implementation of frontend features, utilizing Vue and Nuxt.

vue 2/3   jq   dojo   aws   tailwindcss   electron   css   js(native - es5)   typescript  
vagrant

08.2019 — 05.2022

### Software Engineering, Consultant / Gocream

Engaged in projects like Staya.studio, stay a.dog, and gantt chart, among others.

Engaged in detailed consultations with clients to outline site and app prerequisites, culminating in actionable development strategies.

Collaborated alongside project managers, developers, quality assurance professionals, and clients to effectively resolve intricate technical challenges.

Guided and mentored junior developers and engineers, equipping them with JavaScript skills and actively contributing to the overall team's advancement.

Assumed a leadership role in spearheading software development endeavors, serving as a recognized subject matter expert and the primary point of contact for project management personnel.

Elevated technical leadership among entry-level and junior engineers within the complexities of an enterprise system environment.

Showcased substantial hands-on programming expertise in Vue, React, and Angular, validating practical experience.

Partnered harmoniously with software development and testing team members to architect and actualize robust solutions that aligned seamlessly with client criteria for functionality, scalability, and performance.

Bringing solid experience with React, Vue, and Nuxt to the table.

nuxt   vue3   next.js   ssr   rest   jwt   cypress   WebSockets   django templates   jq  
css   js(native - es5)   react   node.js   fastify   sequelize   activeCollab   typescript

05.2019 — 08.2019

### Software Engineer / ACK glonass

Provided assistance to Angular projects.

Generated websites that ensured compatibility across various browsers.

Explored emerging web technologies and trends, considering their integration into websites.

Offered exceptional client service, fostering enduring relationships and paving the way for future business prospects.

Collaborated with software development and testing teams to create resilient solutions aligned with client needs for functionality, scalability, and performance.

Engaged with fellow engineers to assess and enhance software and hardware interfaces.

Orchestrated streamlined deployment of extensive software installations.

Angular rxjs eclipse swagger slack redmine youtrack gitlab Swagger

07.2018 — 04.2019

### Software Engineer / ProfitCliks

Contributed to the advancement and joint development of the Pushprofit project website.

Managed the CRUD operations for comments and profit calculations derived from leads, utilizing Laravel.

Crafted the frontend interface using Vue JS (with TypeScript) for a Real Time Bidding platform.

Collaborated closely with fellow engineers to assess and refine software and hardware interactions.

Engaged with software development and testing teams to devise robust solutions aligning with client demands for functionality, scalability, and performance.

Integrated external tools and components into the applications.

Shared expertise in TypeScript implementation.

Formulated enhancements and updates for subsystems within end-user application software, catering to local, networked, and Internet-based platforms.

Offered insights and recommendations during team discussions, providing progress reports on timelines, designs, and improvements.

rest react laravel vue vuetify sql redis clickhouse postgres golang  
typescript

03.2018 — 06.2018

### Software Engineer / JobTop (startup is closed)

Created elements for a startup's development.

Enhanced web applications for improved speed, scalability, and security.

Performed unit tests to ensure optimal browser performance.

Incorporated external tools and components into applications.

Worked closely with clients to establish solution specifications.

Revamped outdated code bases to align with contemporary development norms, enhancing functionality.

vue   vuex   gitflow   graphql   youtrack

03.2017 — 02.2018

### Full Stack Developer / SS-Web (freelance)

I found clients for freelance tasks.

Negotiated contracts with clients.

Created UI/UX design tailored to the client.

Developed prototypes for future websites.

Implemented the website using CMS/CMF Modx.

Handled the layout design of newspapers, magazines, and books.

Provided training for working with InDesign.

Yii2   Modx   Less   Adobe photoshop   Adobe indesign   Adobe illustrator

11.2015 — 03.2017

### Full Stack Developer / Style Wedding | Greatlabel

Responsible for supervising technical issues and handling troubleshooting requests to effectively address and resolve user problems.

Strategized and coordinated website development efforts, translating mockups into fully functional web interfaces using a combination of HTML, JavaScript, AJAX, and JSON coding.

Demonstrated expertise in crafting websites by proficiently utilizing HTML, CSS, JavaScript, and jQuery programming languages.
